## Performance As A Service™
Providing Performance Consulting Services for Storage with online access to analysis reports using Perfonics™

Interscape's **SME** lead **Performance As A Service™** provides ongoing pro-active analytics and reporting for Storage & Servers by identifying **performance bottle-necks**, providing **actionable recommendations**, **end-to-end** views, projecting **historical trends** for future growth and identifying opportunities for further **optimization**. **A truly comprehensive approach**.

The robust proprietary Perfonics™ toolset is leveraged to provide **Performance As A Service™ (PAAS)** on an ad-hoc or ongoing (monthly, quarterly or annual) basis for small to very large multi-petabyte storage and systems infrastructure. The PAAS methodology provides a holistic approach by providing both horizontal performance views within a performance domain and vertical views across IT layers. The **Performance As A Service™** methodology includes a SME, the Perfonics™ toolset and a back-end team that customizes the analytics for the client as part of the service at no additional charge.

We can help you with:

- **Performance Assessments** across IT layers: Storage, SAN Switches, Servers, Virtualization (VMWare)
- **Performance Inclusive Capacity Planning** showing historical trends and projections (TB & IOPS)
- **Performance Troubleshooting** – Our SME can help triage performance issues remotely by leveraging our Perfonics™ Tool-chest and the R&D Team for fast efficient turnaround of customized analytics
- **Application Performance Profiling (IO, CPU, Memory, Network)** for Migration and Consolidation Planning, Pre-vs-Post Comparisons & Tiering Recommendations
- **SAN Consolidation** Analysis and Modelling
- **Disaster Recovery** Planning
- Creating **Technical Migration Plans** with source to target mapping

PERFORMANCE AS A SERVICE™ - Key Features

- *Cloud based model with remote SME*
- *Non-intrusive & zero risk – no software or agents needed*
- *Zero resource requirement at your end*
- *Leverages existing & native performance data sets*
- *Multi-vendor storage (EMC, Netapp, HDS, IBM, 3PAR, PureStorage, Nexenta…)*
- *Multi-OS (Windows, Linux, AIX, Solaris…)*
- *ASAP engagements with Quick turn-around*

- *Independent & vendor un-biased Best Practice assessments*
- *Scales for very large enterprise infrastructures*
- *Fixed rate covers SME+Tool+Team*
- *Costs a fraction of a fulltime skilled resource & tool licenses*
- *Over 50+ reports with customized reporting*
- *Short term or long term engagements*
